PROFILE

Unity Developer with 4+ years of commercial experience across mobile games, from hyper-casual and live-service Merge/Match-3 titles to turn-based strategy and 3D multiplayer extraction shooters. Contributed to mobile titles with 10M+ lifetime installs and hands-on experience across gameplay systems, multiplayer, monetization, LiveOps, mobile optimization, custom editor tools, and backend integration.

Delivered measurable impact across live products: increased retention by 11 percentage points, lifted average session length by 50%+, and reduced ANR and crash rates by 90%+.

WORK EXPERIENCE

CODEFATHERSTUDIO | UnityDeveloper | 2024-2026

Projects: ARCFALL: Extraction Shooter, Threads of Echo, Rivaldom: Lead or Fall, Meme Wars

- **Multiplayer:** Built a Photon Fusion dedicated-server multiplayer architecture supporting 10+ player matches and synchronization of 200+ dynamic game entities.
- **Analytics:** Used BigQuery and Looker to identify funnel bottlenecks, increasing retention by 11 percentage points and average session length by over 50%.
- **Stability:** Reduced ANR and crash rates by over 90% through systematic Firebase Crashlytics and Google Play Vitals analysis.
- **Editor tooling:** Built a node-based narrative editor and grid construction tool that enabled designers to create branching storylines and game maps independently.
- **Rendering:** Reduced draw calls in a gameplay match scene from 500 to 80 and improved FPS by 50% on low-end Android devices through rendering and asset optimization./

4ENJOY STUDIO | Unity Developer | 2022-2024

Projects: Merge Villa, Makeover Merge, Kingdom Merge

- **Loading & size:** Reduced Android build size by 70% and shortened initial loading time by 10 seconds through Addressables migration and asset optimization.
- **Monetization:** Integrated and maintained 60+ IAP products and ad monetization flows across mobile titles, including AdMob, AppLovin, and Unity Ads.
- **LiveOps:** Developed monetization events and gameplay features for Merge and Match-3 titles, supporting player engagement and IAP conversion.

FREELANCE | Unity Developer | 2024-2026

- **Prototyping:** Delivered 30+ gameplay prototypes across mobile genres, turning design briefs into playable vertical slices in 3-4 days on average.
- Integrated 2D/3D assets, VFX, and animations into production-ready gameplay systems.

INDIEDEVELOPMENT | 2016-2022

- Independently developed and published Android games end-to-end, reaching 5,000+ installs through ASO and targeted marketing.

SKILLS

Core Unity & Architecture: Unity, C#, OOP, SOLID, Design Patterns, Zenject / VContainer, UniTask
Multiplayer & Networking: Photon Fusion, NGO, FishNet, Mirror, WebSockets, REST APIs
Unity 3D & Visual Systems: NavMesh, 3D Physics, Skeletal Animation, Particle System, URP, Post-processing
UI Development: uGUI, UI Toolkit, DOTween, UI Animation
Unity Editor Tools: Custom Editor Tools, Editor Windows, Workflow Automation, Designer-Facing Tools
Mobile Optimization: Memory/CPU Profiling, Draw Call & Batching Optimization, Addressables, Build Size Optimization, Loading Time Optimization, Google Play Vitals, Firebase Crashlytics
Monetization: IAP Integration, Google Play Billing, AdMob, AppLovin, Unity Ads
LiveOps & Analytics: Firebase, AppsFlyer, Facebook SDK, BigQuery, Looker Studio
Backend Technologies: ASP.NET Core, Entity Framework, Python, FastAPI, SQLAlchemy
Workflow Automation & AI Tooling: Automated Workflows, Custom AI Skills, Agent Configuration, AI Coding Tools, Visual and Animation Prototyping

EDUCATION & LANGUAGES

PSTU | Faculty of Information Technology, Computer Science | 2019-2024

Ukrainian: Native (C2) | **English:** Upper-Intermediate (B2)
